

Newforma Mobile Apps for Project Cloud

Manage project information on the go

Because Newforma apps are integrated with Newforma® Project Cloud collaboration software, information entered once is available to team members whether they're working in the office, in the job trailer, or in the field.

Plans app: project documents at your fingertips

- Each project's most current project plans are delivered automatically to your iPad.
- Mark up and email documents while in the field.
- Zoom and pan documents quickly.
- Create and locate quality control items directly on the relevant plan.
- Designate your favorite plans for quick access.

Capture app: for quality control items

- Available for iPads and iPhones.
- Gather construction quality control tasks, such as punch lists.
- Move quickly through the site – the app stores data locally until you upload it, permitting faster captures.
- For each captured item, define what it is, where you observed it and, if applicable, who and when somebody needs to respond.
- Snap, mark up, and attach photos to captured items.
- Upload items to Newforma Project Cloud to be managed by you or team members.

Tasks app: one stop for field management

- Manage quality control field tasks from your iPad or iPhone.
- View past-due or coming-due items for yourself or any team member who's been assigned tasks.
- Filter items by type, status, space, assignee, originator, due date, discipline, and spec section.
- Update statuses, descriptions, locations, and assignments.
- Add a photo or include one from the Camera Roll.
- View the comment history, or leave a new comment.

Project Teams app: your team, in the field

- Use on iPads, iPhones, or Android smartphones and tablets.
- Find contacts and companies organized by project.
- Automatic updates eliminate manual management.
